

index du vocabulaire des œuvres de Claude Simon

du *Tricheur* au *Tramway*

Présentation

Cet index du vocabulaire de Claude Simon remplace celui réalisé en 1993 au sein de l'équipe Hubert de Phalèse (Paris 3 Sorbonne nouvelle) à partir des textes numérisés par Patrick Rebollar et moi-même¹. Il intègre les œuvres de Claude Simon publiées depuis, en particulier *Le Jardin des Plantes* (1997) et *Le Tramway* (2001), numérisées par Christine Genin. Comme l'index initial, il a été produit à l'aide de la version 4.30 du logiciel *WordCruncher* développée par Electronic Text Corporation à la Brigham Young University².

Les entrées correspondent aux différentes formes graphiques – environ 50 000 – repérées par l'automate. À la différence d'un dictionnaire, qui répertorie des unités lexicales – mots et locutions – et distingue les homonymes, la forme première et les formes fléchies ou conjuguées d'un même mot constituent ici autant d'entrées distinctes, tout comme leurs éventuelles variantes élidées ou tronquées – abréviations, apocopes et aphérèses du style direct, transcription de mots altérés, lexies tétratoïdes diverses –, tandis que les formes homographes – [les] avions / [nous] avions – restent confondues.

Chaque forme graphique est suivie de sa fréquence dans l'ensemble du corpus et des références de ses occurrences – titres abrégés des œuvres et numéros de page. Plusieurs occurrences d'une même forme à l'intérieur d'une même page ne donnent lieu qu'à une seule référence. Les formes de fréquence supérieure à 1000 [seuil qui correspond à une distribution moyenne d'une occurrence toutes les quatre pages] ne sont pas référencées.

Un codage manuel spécifique des fichiers-textes a permis le repérage spécifique de la plupart des noms propres – noms de personnages fictifs ou réels, toponymes, titres d'œuvres, noms d'institutions, etc. –, lesquels apparaissent ici en capitales. À la différence du vocabulaire général, les entrées correspondent autant que possible aux usages lexicographiques, à ceci près que les prénoms constituent des entrées à part entière même quand le patronyme est déjà répertorié.

Cet index sera prochainement consultable via une interface spécifique sur le site de l'Association des lecteurs de Claude Simon [<http://associationclaudesimon.org>], où on trouvera également les concordances de pagination entre les différentes éditions de chacune des œuvres.

Pascal Mougin, UMR THALIM Paris 3 / CNRS
mars 2019

1. Cet index est resté consultable sur le site de l'équipe Hubert de Phalèse jusqu'en 2010. Voir Pascal MOUGIN et Patrick REBOLLAR, « Claude Simon, informatiquement », dans Ralph SARKONAK (dir.), *Claude Simon 2 : féminin / masculin*, Paris, Minard, coll. « Revue des lettres modernes », 1996, p. 183-204 [<http://www.pascalmougin.com/archives/telechargements/C03.pdf>].

2. Il se trouve que la création d'index n'est plus proposée dans la version actuelle du programme [<https://www.wordcruncher.com>]. Par ailleurs, les quelques logiciels lexicométriques aujourd'hui disponibles qui présentent cette fonctionnalité se sont avérés moins commodes que l'ancienne version de *WordCruncher*, même si celle-ci date de 1989 et fonctionne sous MS-Dos.
